

# 5 GREAT REASONS TO INVEST IN PRESSURE WASHING

1

## IT PROTECTS THE HEALTH OF YOUR FAMILY

Depending on where you live and what surrounds your home, mold and mildew can settle in and on the surfaces outside your home. Mold and mildew are a common irritant for those who suffer from asthma and allergies, so pressure washing **AT LEAST** twice a year can be beneficial to easing some of those pain points.

2

## PROACTIVE MAINTENANCE

A routine pressure washing of your home helps prevent the build up of things like mold, mildew, and dirt. If left on the surface of your home, this grime can cause your home's building materials to deteriorate over time, and need to be replaced instead of just repaired. Routine maintenance **IS KEY** to keeping your home in great shape.

3

## PREVENTS MAJOR DAMAGE

The last thing any homeowner wants is to have major damage to their home. Allowing things to deteriorate on the outside of the home can lead to a breakdown inside as well. This can lead to leaks or general rot, which can ultimately cost **THOUSANDS** of dollars.

4

## PRIMES SURFACES FOR PAINT

Before any exterior painting project, it is necessary to have a **CLEAN SURFACE** so as to not trap in grime. Pressure washing will also clear off any old paint that is barely hanging on to allow for a smooth surface to paint.

5

## IMPROVES CURB APPEAL

The **FIRST IMPRESSION** when someone comes to your home will happen the second they pull up. Taking care of the outside of your home not only looks good, but shows that you genuinely care about the health of your home. Keeping up with exterior maintenance helps to increase your property value and the property value of the neighborhood. You can't get buyers inside if they are turned off by the outside.
